WHOLESALE PRICE LIST

Spring 1942

February 14, 1942

TERMS AND CONDITIONS OF SALE

The prices named in this list cancel all previous lists. Being based on current market conditions, they are subject to change without notice and to depletion of stock. All sales are made with the understanding that we shall not be liable in event of crop loss or of damage from other causes over which we have no control.

APPLICATION OF PRICES:—The prices quoted in this list are trade prices and apply on wholesale quantities only. All orders should call for ten or multiples of ten of a variety and size. While we prefer not to break bunches of ten, in general five will be furnished at the rate per 10; 30 or more at the rate per 100, 250 or more at the rate per 1000 where such a rate is published.

Small Quantities:—Less than five of a variety and size is not wholesale, but, for the convenience of our wholesale customers, such orders will be filled at a premium of 5c per plant over the rate per ten with the exception of Evergreens and Deciduous Trees. On Deciduous Trees the premium will be 10% of the rate per ten but not less than 10c per plant.

Special Marking:—All stock selected and labeled by the customer at the Nursery will be subject to an additional charge in accordance with its value—listed prices will not necessarily govern.

TERMS OF PAYMENT:—2% discount for payment within 10 days of invoice date, due net first of second month following date of invoice. These terms are offered only where satisfactory credit arrangements have been made. All accounts not paid promptly on the due date draw interest at 6% from that date.

Cash Before Shipment:—A 3% discount will be allowed where cash in full to cover the cost of stock and packing is received before shipment, except that no discount will be allowed on orders amounting to less than \$5.00. Our experience with defaults on small balances necessitates all such balances being forwarded C. O. D. Be certain that you send enough money to cover the packing charges and avoid the comparatively heavy C. O. D. charges. Any overpayments will be refunded with the invoice.

C. O. D. Shipments:—Orders for C. O. D. shipment should be accompanied by cash for one third of the amount of the order to insure acceptance.

CLAIMS:—Claims, for any reason must be made in writing promptly upon receipt of the stock. We will gladly correct any errors, but we cannot entertain any claims that are not made within ten days after receipt of the stock or are made after the stock has once been accepted.

GRADES:—Our stock is all young, thrifty, and well grown, and is carefully dug and handled. All grades conform to the Standard Grades of the American Association of Nurserymen.

PACKING:—The prices in this list do not include packing. All orders for forwarding by freight or express, except car-load lots, are carefully packed in boxes or bales for which a charge is made sufficient to remunerate for cost of materials and time. No charge is made for loading in bulk in cars or on trucks, but all trucks should carry sufficient tarpaulins to properly cover the stock.

BOXING CHARGES:—Charges are made as low as possible for well made boxes, paper lined:

		12 feet	10 feet	8 feet	6 feet
30x30	inches	 \$5.00	\$4.50	\$3.75	\$3.25
24x30	inches	 4.50	4.00	3.50	3.00
24x24	inches	 4.25	3.75	3.25	2.75
18x24	inches	 3.75	3.15	2.85	2.35
18x18	inches		2.75	2.35	2.00
12x12	inches		2.00	1.65	1.35

Bales 35c and 50c to \$4.00 each depending on size.

TERMS AND CONDITIONS OF SALE — Continued

NON-WARRANTY AND LIABILITY:—We give no warranty, express or implied, as to the growth or productiveness of the Nursery Stock that we sell and we cannot be responsible in any way for results in transplanting. We exercise the greatest care to keep our varieties pure and true to name and hold ourselves in readiness to replace at any time, on proper proof, any Nursery Stock that may prove otherwise or to refund the amount paid, but it is mutually agreed that we shall at no time be liable for any amount greater than that originally paid for the Nursery Stock in question.

DIRECTIONS FOR SHIPPING:—In ordering, please give definite shipping instructions, especially advising as to whether we should ship by freight, express, or truck line. Where full instructions are not given, we ship as we think best serves your interests, but in no case do we assume responsibility for the stock after it has left our hands. The stock becomes the property of the purchaser when turned over to the transportation company, and the risk and cost of transportation belong to the customer.

NOTICE TO ILLINOIS CUSTOMERS

The regulations under the Illinois Retailers' Occupation Tax Law covering the exemption of sales for resale from the 2% Sales Tax require that in order to establish proof that purchases are for that purpose, we must keep on file Certificates of Purchase for Resale on all purchases made by Illinois customers on which we claim exemption from Sales Tax. Illinois customers who have not filed such a certificate with us are therefore requested to accompany their orders with a proper certificate showing their registration number. We must of necessity charge the 2% Sales Tax on the invoices of all customers who do not furnish us with such certificates.

TO THE TRADE

LOCATION AND SHIPPING FACILITIES:—Princeton is located in north-central Illinois 104 miles west of Chicago on the main line of the Burlington Railroad and on three concrete highways—U. S.-Illinois 6 and 34 and Illinois 26. Our office, packing sheds, and home farm are located just south of the city limits on South Main Street (Tiskilwa Road).

TRUCK DELIVERIES:—Several responsible freight truck lines operate through Princeton, with proper connections for transfers to many points, particularly in Illinois and Iowa and points east and north of the Chicago transfer. Rates in most instances are the same or nearly the same as local railroad freight rates.

Where the size of the shipment warrants, we are in a position to arrange for direct deliveries in bulk by truck at reasonable rates. Cost of deliveries by chartered trucks will be quoted on request.

Where customers wish to send their own trucks for bulk loading, it is advisable to give us three or four days advance notice so that we may have the stock ready when the truck arrives and avoid delay. Especially where the orders entail the digging of stock in the field, we cannot guarantee to fill truck orders the same day the truck arrives without such advance notice. Care should be taken that all trucks carry sufficient tarpaulins to properly cover and protect the stock, as we can accept no responsibility whatever for the condition of the stock after it leaves our hands.

FRUITS

Caliper:—It is intended that the caliper shall govern in the grading of fruit trees. Heights given are approximate only and represent the average height of most varieties, but some slow growing varieties may fall short of the heights specified.

APPLES

Our Apples have made up unusually heavy in caliper this year and we can furnish more of the heavier grades than usual. All of the trees offered are buds, none are grafts.

MALUS - Flowering Crabs

Small trees producing a profusion of flowers in the Spring—one of the most desirable and most decorative classes of our ornamental flowering trees. All are small trees, very free-flowering, producing masses of very showy flowers early in the Spring, followed in the Fall by decorative fruits that often persist on the trees well into the Winter. They are perfectly hardy, grow well in any good soil, and are very satisfactory either as specimen plants or in mass plantings.

MALUS identifying Plana — Bechtel Double-flowering Crab. 15-18 ft.

MALUS ioenis plena — Bechtel Double-flowerin	g Crab	15-18	f t.	
This is probably the best known of all of the Crabs. It forms a small upright bushy headed tree				
in May with large and very double fragrant pink				
striking resemblance to small roses. The latest in	blooming b	eriod of		
all of the Flowering Crabs.	0 1		Per 10	Per 100

MALUS - Flowering Crabs - Special Varieties

In addition to the varieties of Flowering Crabs which we are propagating in quanity, we also offer very limited quantities of a number of additional varieties, many of which are of considerable interest. The rate per 10 will be allowed on any assortment of ten plants or more from this list.

MALUS — SPECIAL VARIETIES — LIST NO. 1 Per 10 Per 100\$,75 \$ 6,50 \$.90 8.00 Flowering Crabs, 5 to 6 feet 1.10 10.00

Malus "Frau Louise Dittmann" (3-4 ft.) — A very handsome Crab with large semi-double flowers of soft pink.

Malus "Oekonomierat Echtermeyer" (4-5 ft. and 5-6 ft.) - Drooping, almost pendulous branches; carmine-pink flowers and dark brownish-red fruit.

Malus pendula "Elise Rathke" (3-4 ft. and 4-5 ft.) - A picturesque tree with broad-spreading horizontal branches which ascend at the tips. Light pink flowers and large yellowish-green fruit striped red.

Malus "Veitch's Scarlet" (4-5 ft. and 5-6 ft.) - One of the showiest of the Flowering Crabs with large white flowers and attractive scarlet fruits.

MALUS SPECIAL VARIETIES — LIST NO. 2

	Each	Per 10	P er 100
Flowering Crabs, 3 to 4 feet	.60	5.00	
Flowering Crabs, 4 to 5 feet	.75	6.50	
Flowering Crabs, 5 to 6 feet	.90	7.50	

Malus "Dartmouth Crab" (3-4 ft., 4-5 ft., 5-6 ft.) — Large white flowers and deep reddish-purple plum-like fruit.

Malus dawsoniana (M. fusca x M. pumila) (3-4 ft. and 4-5 ft.) — A slender stemed variety with white flowers and distinctive yellow pear-shaped fruit.

Malus "Lady Northcliffe" (5-6) — A very attractive Crab with pinkish white flowers and small yellow fruit.

MALUS - FLOWERING CRABS — DESCRIPTIVE LIST

MALUS adstringens 25-30 ft.

An upright tree of strong growth and shapely habit; very floriferous and very showy in bloom. The flowers are very large, very dark red in bud, opening to a deep rose-pink.

16-18 ft. arnoldiana — Arnold Crab

A fine hybrid closely resembling Malus floribunda, but with larger flowers of soft pink. Very floriferous and one of the most handsome and shapely of the Flowering Crabs.

12-16 ft. atrosanguina — Carmine Crab

A spreading shrubby tree resembling Malus floribunda in general appearance, but with flowers of a deep rose-carmine that does not fade to white. A very heavy bloomer and a tree of striking appearance.

- Siberian Crab 18-20 ft.

A small round-headed tree, earliest of the Crabs to bloom. The flowers are very large and handsome, pinkish white fading to pure white, and are followed in the Fall by cherry-like red or orange fruits.

baccata — Gibbs Golden Gage 18-20 ft.

A type of Malus baccata differing chiefly in the size and shape of the very decorative fruits, which are of medium size, waxy, five-sided, and a translucent yellow.

18-20 ft. baccata pruneformis

Another Malus baccata type with typical flowers and attractive five-sided red or yellow fruits.

brevipes 12-16 ft.

Closely related to Malus floribunda, but a lower denser grower. Very free flowering and attractive with large nearly white flowers.

coronaria - Wild Sweet Crab

naria — Wild Sweet Crab 15-20 ft. Very showy blush-pink flowers, the most showy of the native Flowering Crabs.

coronaria aurea - Golden-leaved Sweet Crab

A type of the Wild Sweet Crab with golden foliage.

MALUS — Flowering Crabs — Descriptive List — Continued

MALUS floribunda — Japanese Flowering Crab 15-18 ft.

Probably the best known of the Oriental Flowering Crabs, a handsome variety and a very free bloomer. The bloom buds are rose or rose-red, opening into a mass of rosepink blooms that gradually fade to white.

hopa — Hopa Crab 20-25 ft.

A very attractive variety of strong upright growth, probably a variety of Malus adstringens. It bears a profusion of very large double flowers of an unfading rose-red, followed by large edible fruits that are very distinctly red fleshed.

ioensis palmeri — Palmer Crab 15-18 ft.

A regional variety of the native Prairie Crab, coming from the Missouri area. A small spiny tree of compact growth, an improvement over the native Prairie Crab. Flowers large, rosy-pink fading to rosy-white.

magdeburgensis

A Malus spectabilis hybrid with striking semi-double rose-pink flowers borne in dense clusters. Resembles Malus scheideckeri in growth, but is a more robust grower.

prunefolia rinki — Ringo Crab 15-18 ft.

A strong growing variety with wide-spreading branches and large flower trusses. Delicate pink in bud, followed by almost white flowers. The very decorative red or yellow fruit is produced very abundantly and persists on the tree well into the Winter.

purpurea - Purple Crab

Erect and open in habit, with purplish red leaves and deep crimson flowers which are followed in the Fall by dark purplish-red fruits.

purpurea aldenhamensis — Aldenham Crab

rpurea aldenhamensis — Aldenham Crab
Another very showy hybrid with bronze-purple foliage. Very similar to the Eley Crab, but the bloom is larger, semi-double to double, and a bright vineous-red.

purpurea Eleyi — Eley Crab 16-18 ft.

A very showy and handsome hybrid with reddish purple foliage, the best of the purpleleaved Crabs. The flowers are a brilliant bright red followed by dark purple fruits.

robusta — Cherry Crab 20-25 ft.

A handsome tree of strong upright growth. Flowers large, very fragrant, soft pink to white. One of the earliest of the Crabs to bloom.

robusta persicifolia — Peach-leaved Cherry Crab 20-25 ft.

Similar to the type, but with long peach-like leaves.

scheideckeri — Scheidecker Crab 12-15 ft.

A rather small uprightly branched tree with a tendency to grow in bush form when not trimmed regularly. Flowers semi-double to double, borne very freely in upright clusters, red in bud, opening deep pink. A very decorative variety.

seiboldi calocarpa (M. zumi calocarpa) — Toringo Crab

A wide-spreading shrubby Crab with large dark-pink flowers followed by small scarlet fruits. A very floriferous and attractive variety.

theifera — Tea Crab 15-16 ft.

One of the best and most interesting of the Flowering Crabs. Flowers light pink. Very free-flowering, resembling in its flowering habit a Cherry rather than a Crab.

- Zumi Crab 12-14 ft.

A shrubby tree with a dense upright habit of growth. Flowers large, pale pink in bud, opening white.

POPULUS alba bolleana — Bolleana Poplar 50-60 ft. A narrow-columnar form of the White Poplar with green bark		
and silvery foliage. Probably the best of the fastigiate Poplars.	Per 10	Per 100

DECIDUOUS SHRUBS

The Shrubs that we are offering are young, thrifty, well grown, and have been given plenty of room in the row to develop into well-shaped bushy plants. Graded according to the Standard Grades of the American Association of Nurserymen. Figures following the name of the plant indicate average ultimate height under reasonably good growing conditions in this section of the country.

ACANTHOPANAX (Aralia) pentaphyllum — Five-leaved Aralia	6-7 f	t.
A fine massing shrub of medium height with shiny dark green foliage that does not show dust. Grows well in poor and gravely		
soil. 18 to 24 inches 2 to 3 feet 3 to 4 feet 4 to 5 feet		Per 100 \$ 13.00 17.00 20.00 25.00
ALMOND — Pink Flowering (Prunus glandulosa rosea) 5 ft	•	
Heavy well branched plants. We are growing all of our Almonds on their own roots. Such plants are much more compact and better in shape than those grown on Plum roots. 2 to 3 feet, own root 3 to 3½ feet, own root 3½ to 4 feet, own root	2.70 3.20 4.00	24.00 28 . 00

SPIRAEA prunefolia plena — Double Bridalwreath 5-6 ft.		
The true Bridalwreath, with small plum-like leaves and very double white flowers borne in few-flowered umbels. Free-flowering.	Per 10	Per 100
2 to 3 feet		22.00
3 to 4 feet		30.00
thunbergii — Thunberg's Garland Spirea 3-4 ft. Dwarf shrub with slender spreading branches and feathery light		
Dwarf shrub with slender spreading branches and feathery light green foliage. Covered with a wealth of small white flowers be fore the leaves in the Spring.	:-	
18 to 24 inches	1.70	14.00
2 to 2½ feet	1.90	16.00
2½ to 3 feet (\$150.00 per 1000) 3 to 3½ feet	2.10 2.50	18.00 22.00
trichocarpa — Korean Spirea 5 ft.		
One of the newer Spiraeas, quite similar to Spiraea Van Houttei in growth and type of bloom. The blooms, however, are larger and showier and appear about two weeks later.		,
2 to 3 feet	1.80	15.00
3 to 4 feet	2.30	20.00
Van Houttei — commonly known as Bridalwreath One of the most graceful and most easily grown of all massing shrubs; small white flowers in clusters cover the plants in the early Spring.		
18 to 24 inches	1.00	7.50
2 to 3 feet	1.50	10.00
3 to 4 feet	1.90 2.10	16.00 18.00
Sumac — see Rhus.	2.10	10.00
SYMPHORICARPOS chenaulti — Spotted Snowberry The best and most handsome of the Snowberries. A new hybrid with small leaves and white fruit spotted with pink.		
18 to 24 inches(\$ 75.00 per 1000)	1.20	9.00
2 to 3 feet	1.40	11.00
3 to 4 feet(\$125.00 per 1000)	1.70	14.00
racemosus — White Snowberry 4-5 ft. An upright shrub, particularly adapted to planting in shaded places. Waxy-white berries in the Fall.	٠	
2 to 3 feet(\$ 90.00 per 1000)	1.40	11.00
3 to 4 feet	1.70	14.00
vulgaris — Red Snowberry or Coralberry 4-5 ft. A low spreading shrub that does well in shaded places. One of the best that we have for holding steep banks.		
18 to 24 inches(\$ 65,00 per 1000)	1.10	8.00
2 to 3 feet(\$ 85.00 per 1000)	1.40	11.00
3 to 4 feet(\$110.00 per 1000)	1.70	14.00
SYRINGA japonica — Japanese Tree Lilac 18-20 ft. A very large shrub, attaining the proportions of a small tree. Large panicles of creamy white flowers in July long after the bloom of all other Lilacs is gone.		
18 to 24 inches	2.50	22.00
2 to 3 feet	3.20	28.00
3 to 4 feet	4.00	
persica (rothomagensis) — Persian Lilac 8-10ft. An upright vigorous grower, the most free-flowering of all of the Lilacs. Flowers deep purplish red in very large heads. This variety should properly be called Chinese Lilac. (Syringa rothomagenis), as the true Persian Lilac is a small weak grower with pale lilac flowers and is practically unknown in the nursery trade.	2.00	
18 to 24 inches(\$180.00 per 1000)	2.00 2.30	20.00
3 to 4 feet(\$220.00 per 1000)	2.80	25.00
4 to 5 feet	3.60	32.00
villosa, vulgaris and vulgaris alba — see page 29. Hybrid Lilacs — see pages 25 to 28.		

All orders are booked subject to our regular Terms and Conditions of Sale as printed on pages 2 and 3. These should be carefully noted as we cannot vary from them.

FRENCH LILACS

For a number of years we have been specializing in the growing of French Lilacs and are propagating from a long list of varieties covering a wide range of color and form, a list that contains the better and more popular of the older varieties as well as many of the newer and finer types.

OWN-ROOT Plants:—The Lilacs which we offer here are own-root plants. Our French Lilacs are propagated by grafting on small pieces of Privet root, not by budding on Privet or Common Lilac. The grafts are often planted deep, both in the bed and when transplanted to the nursery row. When grown in this manner the Privet acts, as a nurse root for the Lilac scion until such time as the Lilac can develope its own root system. When that is accomplished, it soon overgrows the Privet and the Privet dies off—in fact on some varieties we are even able to remove the Privet root when transplanting from the beds into the field. There is of course quite a little difference in how long it takes for the different varieties to go onto their own roots, but any of our plants which have been grown in the field two years after transplanting are at least started on their own roots.

Own-root plants have the marked advantage over budded plants in that they are perfectly hardy and therefore much longer lived, and that all of the sprouts from the roots will be true to variety. Many nurserymen propagate French Lilacs by budding above the ground on California Privet, or, tho much less frequently, on Common Lilac stocks. Plants budded on Privet are almost invariably short lived unless the plant is set low enough in the ground when transplanted so that the Lilac can develop its own roots, a type of planting seldom accomplished with developed plants even by persons who understand the necessity for deep planting. If planted at the normal depth the plants are not root-hardy, as the tender Privet is apt to kill off during severe winters. Plants left too long on Privet roots are apt to develop a "graft blight" resulting from insufficient union with and overgrowth of the root stock by the scion. Buds on Common Lilac, on the other hand, are root-hardy and make a good union, but the root stocks invariably sprout. Such sprouts, being hard to distinguish from the budded variety and also usually being of stronger growth, often drown out the buds.

In order to facilitate pricing, we have divided the Lilacs which we are offering into five price groups.

We can furnish small quantities of some varieties and sizes not included in the following quantity lists.

For additional varieties of French Lilacs and Descriptive List and Color Classification see pages 26, 27, and 28.

FRENCH LILACS - DESCRIPTIVE LIST

Alphonse Lavelle — flowers double, of medium size, clear lavendar-violet, deeper within than without. Clusters large, shapely, and compact. A splendid variety.

Buffon - single, very attractive mauve-pink flowers with reflexted lobes.

Charles Joly — flowers double, quite large, very dark violet-purple with silvery reflex; clusters open, of medium size. An old variety, but still one of the best all-around double dark reds.

Charles X — an old free-flowering favorite. Flowers single, of medium size, reddish-violet; compact clusters of medium size. One of the most free-flowering of all of the French Lilacs.

Claude Bernard - long panicles of double or semi-double bright mauve lilac flowers.

Congo — single flowers in large open clusters. An old and very popular variety, very deep reddish purple without, lighter within the corolla.

De Croncels — single flowers of medium size in open pyramidal clusters; a fine bright red in bud expanding to lilac-red.

De Mirable — flowers single, large, very dark bluish-violet; clusters large. An outstanding bloom and one of our darkest Lilacs, but the plant is slow-growing and rather dwarf.

Decartes — large panicles of single mauve pink flowers, extra floriferous. The color comes nearer to a clear pink than that of any other Hyacinthiflora variety.

Desfontaines — flowers large, double, violet-blue; in very large open clusters. A conspicious variety of excellent growth characteristics and a good clear color.

Diderot — flowers single, extra large, very deep red; in long, large clusters. A very fine bloom and an outstanding example of the modern showy Lilac, but, like many of the darker Lilacs, is a slow dwarf grower.

Edouard Andre — double flowers of medium size in open much-branched clusters; clear rose, or nearly pink. One of the best of the pink Lilacs.

Emile Lemoine — double well-formed flowers of medium size in large open clusters. As near an approach to pure pink as is usually found in Lilacs.

Frau Bertha Dammann - single white flowers of medium size in unusually large open clusters.

Frau Wilhelm Pfitzer — large single flowers in long open clusters; pale bluish-violet. A strong thrifty plant and an excellent variety.

Gen. Sherman — large many-shouldered upright clusters of single flowers which are of varying shades of porcelain lavendar.

Hugo Koster — single, bluish-violet to light reddish-purple, flowers and clusters both very large. One of the best of the single Lilacs, distinct and attractive.

Jan Van Tol — single, very fragrant, pure white. A dwarf stocky grower with enormous individual flowers in very large symmetrical clusters. An outstanding variety, particularly in the size of the flowers.

Jean Mace — lárge double flowers in large and very compact clusters; bluish-mauve. A fine variety with an unusually good thrifty habit of growth, one of the most free-flowering of the French Lilacs.

Jeanne d'Arc — large double white flowers in long open clusters. A very fine and showy variety. Plant rather dwarf and a late bloomer.

Katherine Havemeyer — flowers large, double, in large compact clusters; cobalt blue flushed mauve. A splendid variety both in flower and growth characteristics, destined to be one of the most popular of the "blue" lilacs.

La Tour d'Auvergne — flowers large, double, and star-shaped, in open narrow clusters of variable size; dark red in bud opening dark purplish violet.

Leon Gambetta — double, lilac-rose; both individual flowers and the trusses are very large.

An outstanding variety, though one of the hardest to grow.

Lamartine — one of the earliest to bloom; single, extremely large trusses of beautiful pale pink flowers.

La Mauve - double; pale lilac-pink flowers in long narrow clusters.

Louvois — extremely large clusters of large single flowers; deep violet-purple with bluish shades. Ludwig Spaeth — flowers single, large, in large well-filled clusters; very deep maroon-red. Very free-blooming, and of strong thrifty growth. A very popular variety and without question the best all-around single dark lilac.

Mme. Casimir Perier — large double creamy white flowers in large well-filled clusters. A very satisfactory double white that may be depended upon to bloom freely each year.

Mme. Lemoine — flowers large, double pure white; clusters narrow, medium to large. One of the most satisfactory and popular of the double whites, and a very dependable bloomer.

Mme. Leon Simon — flowers large, double, in fine large open clusters; lilac-pink. Strong narrow upright grower.

Marechal Lannes — flowers semi-double to double, exceptionally large; in large, full, erect clusters; bluish-violet. A choice and very showy variety.

Marie LeGraye — flowers large, single, creamy white; clusters of medium size. A strong, erect and very profuse bloomer.

Maurice Barres — flowers single, very large, pale azure lilac; large open clusters. A very handsome and showy variety.

Michael Buchner — flowers double, medium to large, pinkish-lilac; long narrow clusters. One of the best known and most popular varieties.

FRENCH LILACS — Descriptive List Continued

Miss Ellen Willmott - flowers large, double to very double, creamy white; in very large and and long panicles. A strong grower and very free bloomer, generally rated as the best of of the double white Lilacs.

Mont Blanc — flowers white, single, very large; in long well-filled clusters. A very showy and beautiful variety that we consider the best of the single white Lilacs.

Montaigne - flowers very large and double; in long narrow clusters; mauve pink. A fine variety of strong growth.

Pascal - very free-flowering; single, a fine light mauve-pink.

Paul Therion — large double flowers in very large and showy well-filled clusters; rosy-lavendar tinged claret, much resembling large double violets. A very fine and showy variety.

Pres. Carnot — flowers large, double, light lilac blue; in long narrow clusters. A free-blooming strong-growing variety of very good color.

Pres. Faillieres - large, pale, lavendar flowers in very large clusters. An outstanding variety with good growth characteristics and showy flowers.

Pres. Grevy - flowers large, semi-double to double, in large pyramidal clusters; a clear soft delicate blue. An old variety that is still one of the best of its color.

Pres. Lincoln - flowers single, medium in size, in long open narrow-pyramidal clusters; wedgewood blue, an unusual color in lilacs and probably the nearest to a true blue.

Reamur — flowers single, very large, violet-carmine and satiny-rose; in long well-filled clusters. A very choice dark Lilac, but a slow and rather poor grower.

Rhum von Horstenstein - flowers very large, single, in long narrow trusses; an even dark reddish purple. A very promising free-blooming new variety.

Renoncule (Ranunculata) - flowers fragrant, double, of medium size, in narrow compact clusters; a pleasing even blue. Free flowering and a strong grower.

Vauban — flowers double, sometimes semi-double, light lilac-pink thou much darker in bud. Ville de Limoges — single flowers of medium size in well-filled pyramidal clusters; mauve-pink. One of the most fragrant of all Lilacs.

Waldeck Rosseau - double flowers of medium size, in large, long, many-branched clusters; deep violet, darker within than without. A very pleasing variety.

William Robinson - flowers double, large, in large open irregular clusters; deep red in bud expanding to light crimson.

CLASSIFICATION TO COLOR:—As it is almost impossible to describe colors of flowers, particularly in a long list of similar varieties, so as to really give a good idea of color tones, we have divided the Lilacs on our list into seven general color groups so as to aid in color classification. It should also be remembered that there is a decided difference in the form of the individual Lilac flowers, as well as in the shape and size of the trusses or clusters. Also that there is often a decided difference in the growth characteristics of the different varieties.

White Varieties

Single Varieties - Frau Bertha Dammann, Jan Van Tol, Marie LeGraye, Mont Blanc. Double Varieties - Edith Cavell, Jeanne d'Arc, Mme. Casimir Perier, Mme. Lemoine, Miss Ellen Wilmott.

Single Varieties - Buffon, Descartes, Lamartine, Ville de Limoges.

Double Varieties - Emile Lemoine, Edouard Andre, La Mauve, Leon Gambetta, Mme. Leon

Red Shades

Single Varieties - Congo, DeCroncels, Diderot, Ludwig Spaeth, Reamur, Rhum von

Double Varieties - Adelaide Dunbar, Charles Joly, La Tour d'Auvergne, Mrs. Edward Harding, Paul Therion, William Robinson.

Blue Shades

Single Varieties - Pres. Lincoln.

Double Varieties - Desfontaines, Jean Mace, Katherine Havemeyer, Pres. Carnot, Pres. Grevy,

Light Lilac Shades

Single Varieties - Gen. Sherman, Maurice Barres.

Double Varieties - Frau Wilhelm Pfitzer, Pres. Faillieres, Vauban.

Dark Lilac Shades

Single Varieties — Charles X, Hugo Koster, Pascal.

Double Varieties — Claude Bernard, Michael Buchner, Montaigne.

Violet Shades

Single Varieties - De Mirabel, Louvois.

Double Varieties - Alphonse Lavalle, Marechal Lannes, Waldeck Rosseau.

All orders are booked subject to our regular Terms and Conditions of Sale as printed on pages 2 and 3. These should be carefully noted as we cannot vary from them.

SYRINGA villosa — Late Lilac or Pink Lilac 8-10 ft.		
A bushy, compact shrub of rapid growth, producing a profusion		
of rosy-pink flowers in June after the Common Lilacs are gone	Per 10	Per 100
18 to 24 inches		15.00
2 to 3 feet	2.30	20.00
3 to 4 feet		
4 to 5 feet	4.00	
vulgaris — Common Purple Lilac 12-15 ft.

The best hardy Tamarix, Slow-growing, compact and upright, with	40	
feathery silvery-green foliage and long panicles of bright pink bloom		
over a long season in early summer.		
18 to 24 inches	1.20	9.00
2 to 3 feet	1.50	12.00
3 to 4 feet	1.80	15.00
4 to 5 feet	2.10	18.00
VIBURNUM americanum — American Cranberrybush 8-10 ft.		
Very similar to the European High-bush Cranberry, but a more		
handsome plant. Profusion of orange-scarlet berries in the Fall.		
18 to 24 inches	2.30	20.00
2 to 3 feet	2.80	24.00
3 to 4 feet	3.30	30.00
4 to 5 feet	4.50	40.00
dentatum — Arrow-wood 8-10 ft.		
An upright shrub of dense growth, very good for massing where a medium to tall shrub can be used. Does well on north sides		
and in partial shade.		
2 to 3 feet	2.00	17.00
3 to 4 feet	2.50	22.00
4 to 5 feet	3.00	27.00
lantana — Wayfaring Tree—10-12 ft.		
A handsome large shrub of upright growth with soft thick foliage		
A handsome large shrub of upright growth with soft thick foliage that turns scarlet in the Fall. Attractive flowers and fruits.		
18 to 24 inches	1.70	14.00
2 to 3 feet	2.10	18.00
3 to 4 feet	2.50	22.00
4 to 5 feet	3.50	30.00
lentago — Nannyberry 15-18 ft.		
A tall upright massing shrub with dark green leaves that turn		
scarlet in the Fall. Large blue-black fruit.		
18 to 24 inches	2.10	18.00
2 to 3 feet	2.80	25.00
3 to 4 feet	3.50	30.00
4 to 4½ feet	4.50	40.00
opulus — European High-bush Cranberry 10 ft.		
A well known tall hardy shrub, with large clusters of scarlet		
fruit in the Fall that remain on the plant until late in the Winter.		
18 to 24 inches	2.30	20.00
2 to 3 feet	2.70	24.00
3 to 4 feet	3.50	30.00
4 to 5 feet	4.50	40.00

Prices quoted are for wholesale quantities. Orders calling for less than five of a variety and size are not wholesale, but will be filled at an advance over printed rates as outlined on page 2.

CLIMBING VINES — CONTINUED

LONICERA japonica Halliana — Hall's Japan Honeysuckle A very vigorous and rapid grower, much used as a ground cover on banks, etc. Flowers yellow to white, very fragrant, borne profusely throughout the Summer. 2 year No. 1	Per 10 1.60	Per 100 12.50
POLYGONUM aubertii — China Fleece-vine		
A light but very vigorous and rapid grower, covered by a wealth of foamy sprays of small white flowers during the late Summer and early Fall.		
2 year No. 1	3.50	30.00
VITIS aestivalis — Summer Grape A very vigorous climbing vine, most common of the native wild grapes. 3 year No. 1	1.70 1.30	14.00 10.00
WISTARIA chinensis — Purple Chinese Wistaria We offer the Wistarias both as seeding plants and as plants grafted from blooming wood of good flowering plants. There is quite a little difference in the blooming ability of different Wistaria plants, and the grafted plants are by far the best to plant where bloom is desired.		
Seedlings, 2 year No. 1	1.50	12.00
Grafted from blooming wood, 2 year No. 1	2.50	22.00
sinensis alba — White Chinese Wistaria		
Grafted from blooming wood, 2 year No. 1	2.80	25.00

EVERGREENS

Prices quoted are for specimen plants that have been regularly transplanted and carefully grown and sheared, suitable for the best landscape work. Unless otherwise instructed, we dig all of our Evergreens B&B. We always dig fresh for each order.

Where customers wish to make special selection of Evergreens and mark trees in the nursery, we will be glad to reserve such trees for them, but an additional charge depending on value, usually between 10% and 20%, will be made. Where such selections are not for immediate shipment, a deposit of 25% of the order will be required to guarantee acceptance.

3			
JUNIPERUS chinensis Keteleeri — Keteleer Juniper		ft.	
A splendid type of formal pyramidal outline, compac in growth and very bushy. The leaves are scale-like and very dark green in color. Formerly classified as a variety of Juniperus virginiana, but now considered as a variety	d y		
of Juniperus chinensis.	Each	Per 10	Per 100

ROSES

We have a fine lot of well matured and carefully graded Oregon grown Roses to offer this Spring—the best that can be obtained. All of the plants are low-budded on Multiflora Japonica with the exception of the few varieties of Climbing Roses that are specified as on their own roots.

Source of Roses Important:—The Middle West, with its hot dry summers, is a hard climate in which to flower Roses and the source of planting stock has been found to be almost as important an item in successful Rose growing here as is the selection of varieties. For a number of years we have been using these Oregon grown Roses and have found that they have given better results than those we have had from any other source. They are sturdy, well rooted and well matured plants, without any coarse overgrowth. They are somewhat more expensive than southern grown Roses, but are well worth the difference in price. We do not offer any southern grown Roses.

Many of the varieties of Hybrid Tea Roses are not adapted to the hot dry summers of this section of the country, and in offering this selection we have attempted to confine ourselves to varieties of merit particularly selected for vigorous growth and free blooming characteristics under the usual weather conditions in the Middle West.

TEA and HYBRID TEA ROSES

2 Year No. 1 Buds — All Northern Grown		
Ami Quinard—a vigorous grower with dark blackish-garnet buds	Per 10	Per 100
opening dark velvety crimson, very fragrant	3.20	\$ 28.00
Betty Uprichard—salmon pink, stained coppery red on the outside of the petals, very fragrant; buds copper red	3.20	28.00
Christopher Stone—a finely formed and very fragrant rose with bright scarlet flowers. Dark green disease resistant foliage	3.80	35.00
Condesa de Sastago—a very free-flowering two-toned rose of strong bushy growth. The flowers are fragrant and very double, golden yellow without, deep coppery pink within	3.20	28.00
Dame Edith Helen—one of the largest and most perfectly shaped of the Hybrid Teas; bright glowing pink, very fragrant; one of the best out-door roses for this section	3.20	28.00
Duquesa de Penaranda—a strong vigorous variety, very free-flow- ering; apricot orange to dark pink	3,50	32.00
Edith Nellie Perkins—long-pointed buds; rich orange-pink outside, salmon pink inside of petals	3.20	28.00
E. G. Hill—large, massive, and very fragrant blooms of deep velvety maroon	3.20	28.00
Etoile de Hollande—the finest dark red rose for this section; a strong grower and free bloomer, very fragrant	3.20	28.00
Francis Scott Key—brilliant crimson; both buds and blooms are exceptionally large, double, and well shaped	3,20	28.00
Glowing Carmine—a tall vigorous grower and continuous bloomer with long-lasting and fragrant deep carmine blooms	3.50	32.00
Golden Pernet (Mons. Julien Potin)—finely formed pointed buds; deep golden vellow, a much richer color than the original	5.50	52.00
Pernet, which it holds without fading	3.50	32.00
flowers that do not fade. One of the better reds for this area	3.20	28.00
Gruss an Teplitz—the hardiest of the Hybrid Tea Roses, a very free and continuous bloomer, deep scarlet-crimson	3.20	28.00
Joanna Hill—very double bloom, the center is Indian Yellow, surrounded by petals of a golden-buff shade	3.20	28.00
Julien Potin—See Golden Pernet		

All orders are booked subject to our regular Terms and Conditions of Sale as printed on pages 2 and 3. These should be carefully noted as we cannot vary from them.

TEA and HYBRID TEA ROSES — CONTINUED		
	er 10	Per 100
Kaiserin Auguste Viktoria—free-flowing, very double, pure white, the standard pure white bedding rose	3.20	28.00
Lady Margaret Stewart—very large, a vigorous grower, copper orange buds opening a bright yellow flushed orange-red	3.20	28.00
Mme. Edouard Herriott—a very brilliant coral-red, shaded orange and scarlet	3.20	28.00
McGredy's Ivory—a vigorous disease-resistant plant. Very large long-pointed buds and perfectly shaped creamy white flowers that shade toward yellow at the base of the petals	3.50	32.00
Mme. Joseph Perraud—long, slender, pointed, fragrant buds; blooms, orange buff shading to deep pink at the petal margins, a really superior rose	3.50	32.00
Mme. Jules Bouche—a medium sized but superb white with a tinge of blush pink at the center	3.20	28.00
Mrs. Charles Bell—soft salmon pink, very sweetly perfumed. One of the best of the Radiance type	3.20	28.00
Mrs. Erskine Pembroke Thom—canary yellow; long buds and large well-shaped flowers; vigorous and free flowering	3.20	28.00
Mrs. Henry Bowles—clear rose-pink shaded salmon, vigorous and free flowering	3.20	28.00
Mrs. Pierre S. DuPont—reddish gold in bud, opening to a deep yellow. A strong vigorous grower and profuse bloomer	3.20	28.00
Mrs. Sam McGredy—a very fine tri-color with long-pointed buds and large scarlet-copper-orange flowers that are flushed with red on the outside of the petals. A vigorous disease resistant		
President Herbert Hoover—one of the most popular Hybrid Teas	3.50	32.00
for this area. A glorious rose with long-pointed buds and large full flowers, very fragrant; an unusual combination of orange, gold, and maroon	3.20	28.00
the best for this section of the country, as it will continue to produce flowers during the most unfavorable hot weather. Strong upright grower, free bloomer	3.20	28.00
Red Radiance—a free-blooming bright rosy-red counterpart of Radiance, of sturdy growth and delightful fragrance	3.20	28.00
Rouge Mallerin—large, long-lasting and very double blooms of a striking velvety red. A very promising variety	3.50	32.00
Souvenir de Claudius Pernet—pure sunflower yellow; the old stand-by for a pure yellow rose	3.20	28.00
Souvenir de Mme. C. Chambard—large, semi-double, fragrant flowers; the outer petals are a deep rose-red, the inner petals	2 20	20.00
a deep salmon pink shaded gold. A vigorous upright grower Talisman—long-pointed orange-red buds; the blooms are golden	3.20	28.00
vellow suffused with apricot and coppery red Ville de Paris—a distinct pure deep yellow rose with the unusual	3.20	28.00
characteristic that its color does not fade	3.20	28.00
2 Year No. 1 Buds — All Northern Grown		
American Beauty—a well known and very popular variety, frag- rant, brilliant light crimson	2.00	. d 25.00
Frau Karl Druschki (Snow Queen)—the best pure white rose	2.90	\$ 25.00 25.00
General Jacqueminot—clear bright crimson, a very free bloomer, an old garden favorite	2.90	25.00
Paul Neyron-bright deep pink, a fine variety and one of the	2.90	23.00
largest of all Hybrid Roses Ulrich Brunner—rich cherry red, a strong vigorous grower	2.90 2.90	25.00 25.00

Prices quoted are for wholesale quantities. Orders calling for less than five of a variety and size are not wholesale, but will be filled at an advance over printed rates as outlined on page 2.

PEONIES

For a complete list of the varieties of Peonies that we have to offer, please refer to our special Peony list for the Fall of 1941, a copy of which will be sent on request. Peonies have been a specialty with us for many years and we are growing a very comprehensive list of varieties.

Figures following the name of the variety show ratings according to the classification of the American Peony Society.

GRADE:—All of the plants offered are strong divisions of two and three year old clumps carrying from 3 to 5 eyes; well rooted, well balanced, and well developed plants. All have been grown for plants only—we do not offer divisions of old cut-flower plants.

PEONIES TO COLOR

We make these up from named varieties of our own selection, shipping without differentiation of varieties.

	100	Per 1000
	7.00	\$ 60.00
